A one-stop Occupational Health & Safety partner **since 2019.**

Founded in 2019, CMK Safety Solutions strives to ensure that all Occupational Health and Safety needs of our clients are catered to on an exceptional level.

With over 16 years of Occupational Health and Safety experience (since 2010) in the Construction, Mining, Petrochemical and Paper/Pulp industries, we have been exposed to various environments and the requirements they place on Occupational Health and Safety. That experience is the foundation of every file, audit and training course we deliver.

FOUNDED	EXPERIENCE	INDUSTRIES	FOOTPRINT

Alberton, Gauteng	years in OHS, since 2010	construction, mining, petrochemical, paper/pulp	wherever your project is

01

Making your HSE work on site

Files and training that get used by your crew, not filed away.

02

Improving your OHSE statistics

Same-day audit reports, closed-out findings, fewer consecutive issues.

03

Growing our national footprint

Alberton-based, RSA-wide. Wherever your project is, we'll be there.

Every part of OHS, **handled end to end.**

From the first project-specific HSE file through to monthly audits, accredited training, 3D scaffold design and HSE personnel: one consistent partner for the whole life of your project.

-
- 01

Occupational Health & Safety Files

Project-specific HSE files compliant with legislation and Client HSE specifications.
-
- 02

HSE Consulting

Monthly file audits, site condition audits, and PPE inspections — with same-day reports.
-
- 03

Accredited Health & Safety Training

SAQA / SETA-accredited courses across First Aid, Fire Fighting, Working at Heights, Scaffolding and more.
-
- 04

Scaffold & Product 3D Designs

Detailed 3D renders with material lists, leg loads, and optional structural-engineer approval.
-
- 05

Sourcing of HSE Officers & Managers

Vetted, qualified HSE Officers and Managers placed full-time on your project.
-

Safety files that pass the first audit.

At CMK Safety Solutions we consistently ensure that our Clients have Occupational Health and Safety files which are in line with the requirements of applicable legislation and in accordance with Client HSE specifications.

These files are carefully constructed so they are easily audited by the Client or Safety Agent, and easily communicated to the workforce.

We ensure the file is approved by the Client on the first audit and properly communicated to all employees of the contractor — so there are no delays to the start of a project.

CMK fills the Safety Officer, Risk Assessor, Fall Protection Plan Developer and Incident Investigator appointments on the file.

WHAT YOU GET

- ✓ Project-specific OHS file built from your scope, not a template
- ✓ All requirements communicated to relevant employees (HSE Rep inspections, weekly checklists)
- ✓ Approval on first audit, every time
- ✓ Updated as project conditions change

HOW IT WORKS

01

Request

Fill in the online Safety File Request: company, site, scope and people.

02

Build

A project-specific file to legislation and the Client HSE Specification.

03

Approve

Approved by the Client on the first audit, so your start date holds.

04

Communicate

Requirements explained to your workforce: HSE Rep inspections, weekly checklists.

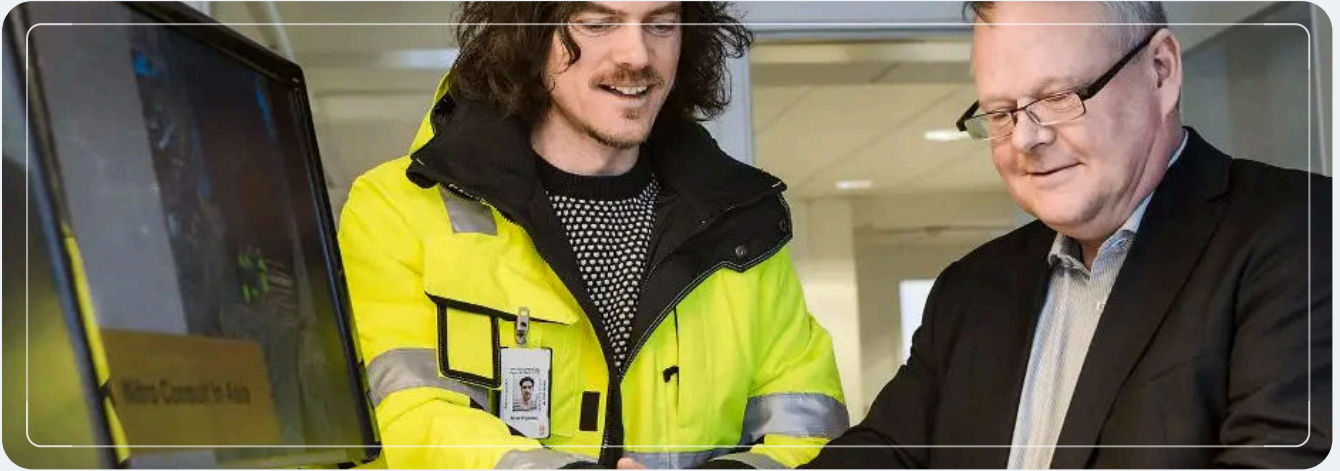

Request your safety file online

Answers save as you type. Send documents by e-mail or a OneDrive / Google Drive link.

Compliant month after month, **not just on day one.**

We offer Occupational Health and Safety consulting that keeps your project compliant — month after month — with practical, on-site outcomes.

All audit findings and reports are submitted to the Client on the day of the site audit, so the Client is aware of any deviations immediately. Findings are closed out by CMK where possible, or escalated to the Client for action.

WHAT THE SERVICE INCLUDES

- ✓ Monthly auditing of the OHS file against legislation and client specifications
- ✓ Reports on outstanding items including weekly/monthly inspection status
- ✓ Site condition audits ensuring work is executed safely
- ✓ Tools, PPE and Safety Harness inspection
- ✓ Tracking client monthly audit results to prevent consecutive findings

SAME DAY

All audit findings and reports are submitted to the Client on the day of the site audit. Findings are closed out by CMK where possible, or brought to the Client's attention.

Competent crews, trained to the OHS Act.

CMK Safety Solutions offers a wide range of training courses to ensure that all employees on your project are competent and trained as per the requirements of the OHS Act. Our training courses are accredited to the relevant Unit Standards as set by SAQA and each relevant SETA where applicable.

First Aid Level 1, 2 & 3

SAQA-aligned First Aid training across all three levels for workplace responders.

Fire Fighting Training

Hands-on fire response and extinguisher use, accredited to relevant Unit Standards.

Working at Heights

Fall protection and working-at-heights training for site personnel.

Scaffolding Erection & Inspection

Erection, dismantling, and inspection of scaffolding to industry standard.

HSE Representative

Train your appointed Health and Safety Representatives to perform inspections per the OHS Act.

Incident Investigation

Root-cause analysis training for supervisors and HSE personnel.

Legal Liability for Managers

OHS Act and legal liability training for line managers and supervisors.

Forklift & Lifting Equipment

Operator training and inspection for forklifts and lifting equipment.

General HSE Training

General Occupational Health and Safety induction and awareness training.

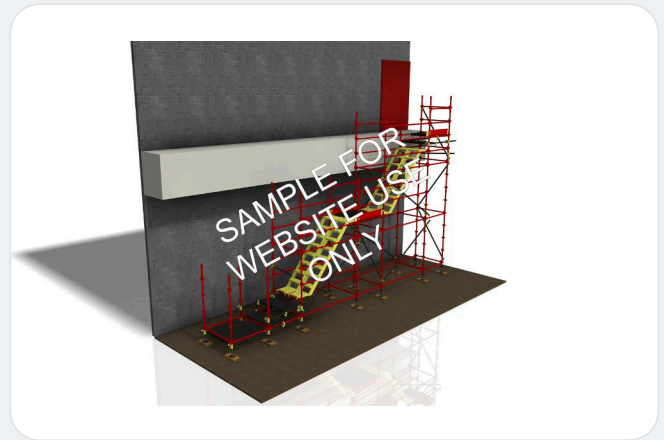

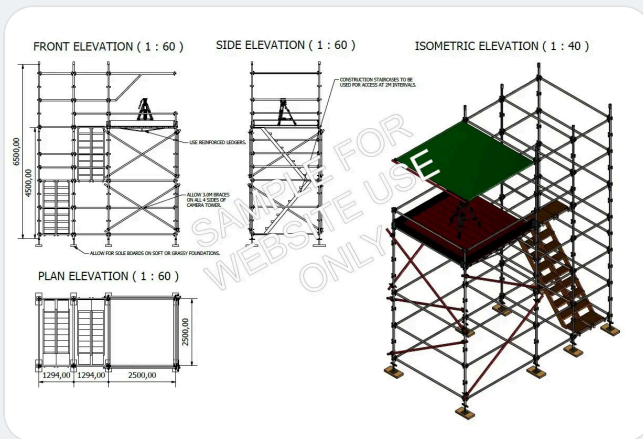

Fall Protection Plan Developer

Training to develop site-specific fall protection plans.

PER-DAY RATE

Pricing is competitive and charged at a per-day rate so you get the most benefit by adding as many delegates as the Unit Standard and SETA allow.

Build it on screen before it goes up.

CMK Safety Solutions creates detailed and lifelike designs and renders for your Scaffold or Product requirements.

All designs are produced to Client requirements and can be approved by a structural engineer if needed.

Every design includes a material list, loading on platforms, and leg loads on the scaffolds — so your team can build with confidence.

- ✓ Detailed 3D scaffold and product renders
- ✓ Front, side, plan and isometric elevations
- ✓ Material lists
- ✓ Platform loading and scaffold leg loads
- ✓ Optional structural-engineer approval

Competent HSE personnel, without the hassle.

CMK Safety Solutions removes the problems and hassles with sourcing and placement of competent and capable HSE Officers or Managers on a full-time basis for your project.

All candidates are carefully vetted and all qualifications are verified, so our Clients only receive the best quality HSE personnel available.

This also reduces your administration: wages, contract administration and workmen's compensation are handled by CMK Safety Solutions.

Ready when you are. Let's make your HSE work on site.

Construction

Project-specific HSE files, daily audits, and accredited training for site teams.

Mining

OHS Act compliance, lifting and scaffolding training, on-site safety officers.

Petrochemical

Hot-work files, fire-fighting training, and routine site condition audits.

Paper / Pulp

Safety files matched to plant specifications, inspection and PPE programs.
